KNOWLEDGE IS . . . GROOVY!

How much do you know about

Literature

History

Science

Music

Sports

Language

Geography

Mathematics

Show Biz

Odds and Ends

?

Here's a book that will tell you how you rate—and let you have a ball at the same time. It's a brain-stimulator with the emphasis on entertainment. Test yourself—or use the quizzes as a game to make your next party the swingingest yet. Try it, and you'll agree that knowledge is fun!

ABOUT THE AUTHORS

Neil Farber is Assistant Principal of a Manhattan junior high school and is in charge of the English Department and the school's corrective reading program. Ira M. Josephs, a language arts teacher in the New York City school system, is a freelance journalist and author.

INTRODUCTION

Aside from its outright informational value, the ask-me-another type of amusement never misses in giving the gathering or party a lift just when the fun is beginning to sag. Questions posed and answers given—or occasionally missed—just naturally capture and hold the delighted attention of the quizzer, the quizzee, and the audience.

Browse through the ten major sections and hundreds of questions in this book. Chances are great that you'll begin answering questions here and there, peeking in the back section to verify your answers. The built-in challenge of the quiz to your knowledge and common sense is irresistible.

With so many areas of information in the *Party Fun Quiz Book* to choose from, it is certain that everyone in the group will want to join in the contest. After all, everyone is an expert in some area, whether that area is TV stars, outer space, mathematics, sports, or what-have-you. In no time at all every person in the room, even the most shy, succumbs to the challenge of the "category."

The rules are flexible, and can be modified to suit the occasion. There are four categories of questions in every subsection: Amateur, Professional, Expert, and Bonus. The individual player or team member decides on his category based on his own

knowledge of the subjects offered. Naturally, the more difficult the question, the more points are awarded for the correct answer. Should the answer given prove to be wrong, the points are subtracted from the score of the contestant, but the score never dips below zero.

The quizzer (host or hostess) and participants should agree before the start of the game as to time limits. Bear in mind that the main idea is to allow all to participate in having a good time.

The special Bonus question is a first-come-first-served type. When the Bonus question is posed, anyone in the game may interrupt, even before the reading of the question is completed. Should the answer be wrong, the contestant who gave it must drop out for the time being, and the question is repeated for the remaining players. Thus, while the questions in the other three subsections allow even those with slow recall to gain points, the Bonus question is intended to benefit the quick thinkers in the group.

Quiz games for fun are probably as old as the language itself, and are time-tested, popular sources of entertainment. We are pleased to offer the *Party Fun Quiz Book* to help further the long and happy tradition.

(Answers on page 145)

GENERAL SCIENCE—PART 2

Amateurs (3 points)

A-1. True or False. Dehydration is one way of preserving food.

A-2. We live at the bottom of an ocean of _____.

A-3. True or False. In refrigeration, warmth is removed.

Professionals (5 points)

P-1 Acoustics is the science dealing with the study of _____.

P-2. In atomic fission, what is released?

P-3. The air we breathe is largely composed of what gas?

Experts (8 points)

E-1. True or False. Foam fire extinguishers rather than water should be used on oil or gasoline fires.

E-2. On the Fahrenheit scale, pure water freezes at 32 degrees. What would be the corresponding reading on the centigrade scale?

E-3. Imprints of ancient organisms found in rock formations are called _____.

Bonus Questions (10 points)

Bonus-1. The smallest unit of matter is the atom. Atoms combine to form _____.

Bonus-2. A mixture of metals, such as bronze, is called an _____.

(Answers on page 146)

INVENTORS AND INVENTIONS—PART 1

Name the invention associated with the following individuals:

Amateurs (3 points)

A-1. Eli Whitney (1765-1825). In 1793, he produced a machine which boomed the economy of the South.

A-2. Wilbur Wright (1867-1912). With his brother Orville, he successfully exhibited their invention at Kitty Hawk, N. C., on Dec. 17, 1903.

A-3. George Pullman (1831-97). Interested in a long-distance travel, he built the "Pioneer," in 1864, a sample of his invention.

Professionals (5 points)

P-1. Elias Howe (1819-67). In 1865, he finally received credit for the invention which changed the lives of millions of women.

P-2. Cyrus McCormick (1809-94). In 1831, he delighted agricultural interests with his invention.

P-3. Guglielmo Marconi (1874-1937). In 1896, his invention brought men closer together.

Experts (8 points)

E-1. Ottmar Mergenthaler (1854-99). The initial form of his invention appeared in 1884.

E-2. Gerardus Mercator (1512-94). He was first to use the word "Atlas" as the name for a collection of maps.

E-3. Elmer A. Sperry (1860-1930). His invention, first used in 1911, has become essential to successful navigation.

Bonus Questions (10 points)

Bonus-1. Alfred Nobel (1833-96). The foundation he established awards annual prizes.

Bonus-2. Abner Doubleday (1819-93). This American Army officer contributed a national sport to his country.

(Answers on page 146)

INVENTORS AND INVENTIONS—PART 2

Amateurs (3 points)

A-1. Samuel F. B. Morse (1792-1872). After spending the first part of his life pursuing a career in art, he turned to science.

A-2. Robert Fulton (1765-1815). The "Clermont" remains his most famous contribution to the world.

A-3. Samuel Colt (1814-62). In 1835, he patented the invention which helped to tame the West.

Professionals (5 points)

P-1. James Watt (1736-1819). He obtained his idea from a boiling tea kettle. His name also stands for a unit of electric power.

P-2. Elisha Otis (1811-61). His invention developed from a device to prevent hoisting machinery from falling.

P-3. Charles Goodyear (1800-60). Tradition has it that his trial-and-error method included 10,000 experiments.

Experts (8 points)

E-1. George Westinghouse (1846-1914). The world adopted his invention for use on railroads.

E-2. Richard Arkwright (1732-92). Because of his invention, workers rioted for fear they would lose their jobs.

E-3. James Naismith (1861-1939). In 1891, he invented the only sport that is truly American in origin.

Bonus Questions (10 points)

Bonus-1. Johannes Gutenberg (1397?-1468). This German craftsman brought new riches into the lives of the common people.

Bonus-2. Rudolph Diesel (1858-1913). The invention which carries his name was demonstrated in 1897.

(Answers on page 146)

LIVING THINGS—PART 1

Amateurs (3 points)

A-1. Man is dominant on earth because of his (a) size, (b) eyes, (c) brain or (d) spinal column.

A-2. True or False. Animals that live in water are under greater pressure than are animals who live on land.

A-3. True or False. Fish do not need oxygen.

Professionals (5 points)

P-1. An animal that has no pigment is called an _____.

P-2. True or False. When a dog's ears are cropped, its puppies will have short ears, too.

P-3. The smallest blood vessels in the body are the _____.

Experts (8 points)

E-1. Man's chief competitors are the _____.

E-2. In his experiments concerning heredity, Mendel used (a) dogs (b) pea plants or (c) geranium plants.

E-3. The ability to coordinate the muscles involved in dancing is centered in the part of the brain called the _____.

Bonus Questions (10 points)

Bonus-1. The substance that enables green plants to manufacture glucose is called _____.

Bonus-2. About (a) $\frac{1}{3}$, (b) $\frac{1}{2}$, (c) $\frac{2}{3}$ or (d) $\frac{1}{4}$ of your body is water.

(Answers on page 146)

LIVING THINGS—PART 2*Amateurs (3 points)*

A-1. The unit of structure in all animals and plants is the _____.

A-2. True or false. A squid has no spine and therefore is classed as a vertebrate animal.

A-3. Extinct, giant reptiles that roamed the earth in prehistoric times were the _____.

Professionals (5 points)

P-1. True or false. Scientific evidence indicates that given the same kind of environment, no race or group is superior to another.

P-3. What fungus disease can be picked up by walking barefooted on a locker room floor?

Experts (8 points)

E-1. Blood circulates through the body in veins and arteries. In which of these two types of blood vessels does the blood have more oxygen?

E-2. True or false. Digestion starts in the mouth.

E-3. The heart has (a) 2, (b) 3 or (c) 4 chambers.

Bonus Questions (10 points)

Bonus-1. The great artery that carries blood from the heart is called the _____.

Bonus-2. To overcome the effects of a poison, what must be administered immediately?

(Answers on page 147)

MEDICINE AND HEALTH—PART 2

Amateurs (3 points)

A-1. True or false. The housefly carries bacteria of many kinds.

A-2. A substance used to kill germs in a cut is called an _____.

A-3. Has science found a cure for the common cold?

Professionals (5 points)

P-1. Quinine is used in the treatment of (a) diphtheria, (b) malaria, (c) sleeping sickness or (d) typhoid fever.

P-2. What vitamin is essential to the diet if night blindness is to be avoided?

P-3. An individual lacking in red blood cells is said to be _____.

Experts (8 points)

E-1. A human body in good health maintains a temperature of about (a) 98.6 degrees, (b) 96.8 degrees or (c) 89.6 degrees Fahrenheit.

E-2. The anopheles mosquito carries the disease known as _____.

E-3. True or false. A balanced diet must include table salt.

Bonus Questions (10 points)

Bonus-1. Rickets, a disease characterized by soft bones and loss of teeth, is due to a lack of what vitamin in the diet?

Bonus-2. What causes diabetes?

(Answers on page 147)

OUTER SPACE—PART 1

Amateurs (3 points)

A-1. True or false. The entire earth receives only a billionth of the energy released by the sun.

A-2. Do stars really twinkle?

A-3. True or false. It is certain that there is no life of any kind on Mars.

Professionals (5 points)

P-1. What is the smallest planet in our solar system?

P-2. Does the earth remain a constant distance from the sun?

P-3. True or false. Our sun is the only sun in space.

Experts (8 points)

E-1. The outermost planet visible to the unaided eye is _____.

E-2. Compared to Venus, Mars is (a) larger, (b) smaller or (c) almost the same in size.

E-3. The sun's diameter is about (a) 8,640 miles, (b) 86,400 miles, (c) 864,000 miles or (d) 8,640,000 miles.

Bonus Questions (10 points)

Bonus-1. The stars are so far away that we measure the distance in _____.

Bonus-2. The earth's axis is tilted at an angle of (a) $23\frac{1}{2}$ degrees, (b) 15 degrees or (c) 7 degrees.

(Answers on page 148)

OUTER SPACE—PART 2

Amateurs (3 points)

A-1. True or false. The sun is the nearest star to the earth.

A-2. Mars is known for its _____ color.

A-3. Traveling around the sun in orbits are (a) 7, (b) 6 or (c) 9 planets.

Professionals (5 points)

P-1. Sir James Jeans said there are probably as many stars as there are grains of sand on all beaches of the world. Is this true?

P-2. We know that the earth rotates on its axis. Does the sun?

P-3. The seasons on Mars are about the same length as on earth. True or false.

Experts (8 points)

E-1. Name the largest of the planets.

E-2. Stargazers know that the brightest star in the sky is _____.

E-3. True or false. Halley's Comet, last seen in 1910, will never return.

Bonus Questions (10 points)

Bonus-1. What is the name for the galaxy of which our sun is only a minor star?

Bonus-2. Name the planet farthest away from the sun.

(Answers on page 148)

OUTER SPACE—PART 3
(MOON FACTS)

Amateurs (3 points)

A-1. True or false. There are oceans on the moon.

A-2. The moon is to the earth as the _____ is to the sun.

A-3. Is the moon the earth's nearest neighbor?

Professionals (5 points)

P-1. The moon travels around the earth. How long does one complete trip take?

P-2. Should the astronauts exploring the moon expect some periods of bad weather.

P-3. Will a parachute be of use in avoiding a rough landing on the moon.

Experts (8 points)

E-1. An eclipse of the moon is caused by the shadow of the _____.

E-2. Approximately how much of the moon's surface do we see?

E-3. You would weigh (a) $\frac{1}{2}$, (b) $\frac{1}{4}$, (c) $\frac{1}{6}$ or (d) $\frac{3}{4}$ as much on the moon as you do on the earth.

Bonus Questions (10 points)

Bonus-1. When the moon covers the sun in total eclipse, a brilliant light is visible around the edges. What is it?

Bonus-2. We see the moon because it reflects light from the _____.

(Answers on page 148)

MATHEMATICS

MIND SHARPENERS—PART 1

Amateurs (3 points)

A-1. When 5 is divided by a fraction, the quotient is 15. What is the fraction?

A-2. In 1950 Miss Florence Chadwick swam the English Channel (from France to England) in 13 hours, 28 minutes. How much less than a day did this feat take?
